### Grass Trimmers

A neat lawn is probably the first impression you get about a well kept garden. You can have the tidiest garden beds with the best flowers and greenest shrubs, however, if the grass is untidy no-one will notice the flowers or shrubs.

A good lawnmower is just the start of a good looking lawn. If the lawn edges are trimmed you will make it seem even better.

Sydney manufacturer *Goliath Garden Tools*, have launched a new range of grass trimmers. Designed for the home clean up or the professional landscape gardener, they are a tough and powerful range at very competitive prices.

#### Triggered Line Feed System

Grass trimmers have been a part of the home tool kit for many years now, but *Goliath Garden Tools*, say their new range has a unique trigger line feeding system, which makes the job much easier, much quicker and avoids costly trimmer head replacement.

*Goliath Garden Tools* have long been known for innovation in the garden tool sector and say the new grass trimmer will once again set the trend in the landscaping industry.

The trigger line feeder allows the operator to quickly feed up to 100mm of line into the cutting head with a trigger cleverly placed in the handle of the grass trimmer. The trigger replaces the bump system of many other grass trimmers, which eventually cause the head to wear out from contact with the hard ground.

#### Grass Trimmers For All Jobs

The *Goliath Grass Trimmer* is available in six sizes for the home gardener and eight varieties for the professional landscaper, different sizes and power levels depending on the job to be done. Trim tight spaces with ease or open terrain where more power is needed.

Contact your local *Goliath Garden Tools* dealer for a demonstration and see how a *Goliath Grass Trimmer* can save you time, effort and expense.
